PROFILE

BCA graduate and current MCA student with hands-on web development experience using PHP, MySQL, and Django. I specialize in building practical applications, ranging from an AI-powered debate chatroom to optimizing the UI, backend email systems, and overall code quality for a live GST billing platform.

EDUCATION

St George's College Aruvithura

Bachelor of Communication
GPA: 6.43

2022 - 2025

Kendriya Vidyalaya

XII , CBSE
Percentage : 68.2%

2022

Kendriya Vidyalaya

X , CBSE
Percentage : 67.6%

2020

SKILL

- Programming Languages & Frameworks: Python, Django, PHP
- Web Technologies: HTML, Full-Stack Web Development, UI Optimization
- Databases: MySQL
- Tools & Integrations: Gemini AI (API/LLM integration), Email System Integrations, Code Refactoring

PROJECTS

Production GST Billing System | Django, Python

- Optimized the user interface and refactored core backend code for a live, production-level GST billing application used by a corporate client.
- Developed and integrated automated email handling systems to streamline business operations and billing communications.
- Collaborated with a team to clean and maintain a robust codebase, ensuring the application met real-world business requirements.

AI-Powered Debate Chatroom | PHP, MySQL, HTML, Gemini AI

- Built a full-stack, web-based chatroom platform designed to replicate the interactive experience of live debate rooms.
- Integrated Gemini AI to automatically generate relevant debate topics and dynamically create attendable rooms for users.
- Managed database architecture using MySQL to handle user sessions, chat histories, and room management efficiently.
